About NEJM AI and the research article

About NEJM AI

NEJM AI is a new journal launched by the New England Journal of Medicine (NEJM) in 2024, focusing on groundbreaking research in artificial intelligence in the medical field. As the newest member of the most influential family of journals in the medical community, NEJM AI upholds NEJM's rigorous academic standards and is dedicated to publishing AI innovations that can truly transform medical practice. The launch of this journal marks the recognition of the importance of artificial intelligence in the field of medicine by the mainstream medical community.

Research Article

“Development and Validation of a Multimodal Multitask Vision Foundation Model for Generalist Ophthalmic Artificial Intelligence” by Professor Scott Yuan Wu’s team at CUHK in collaboration with Professor Wang Ningli’s team at Beijing Tongren Hospital
