

About The Chinese University of Hong Kong – University of Exeter Joint Centre for Environmental Sustainability and Resilience (ENSURE)

Launched in 2018, The Chinese University of Hong Kong (CUHK) – University of Exeter Joint Centre for Environmental Sustainability and Resilience (ENSURE) aims to embark on large, impactful interdisciplinary collaborations to tackle emerging issues related to a changing environment and human health and well-being. ENSURE serves as a platform for international academic exchange, promoting policy-related works and nurturing the next generation of young researchers to address sustainable development challenges. Drawing on the complementary strengths of the two universities – the Institute of Environment, Energy and Sustainability (IEES) at CUHK and the Environment and Sustainability Institute (ESI) at the University of Exeter (Exeter) – the two Universities entered into this long-term partnership to strengthen research impacts and visibility globally. This joint research centre reflects their common vision of promoting interdisciplinary research excellence which delivers benefits by tackling grand challenges and fulfilling societal needs globally.

About the Institute of Environment, Energy and Sustainability (IEES)

The Institute of Environment, Energy and Sustainability (IEES), established in 2011, aims to promote multidisciplinary environmental research and education at The Chinese University of Hong Kong (CUHK). By integrating CUHK's strengths in various disciplines, IEES aspires to build synergy and address some of the most pressing issues concerning the long-term sustainability of human society. IEES endeavours to work in collaboration with industrial, government and non-government organisations as well as different community stakeholders to build a better environment for our future generations.
