

The Chinese University of Hong Kong – University of Exeter Joint Centre for Environmental Sustainability and Resilience (ENSURE)

Launched in 2018, The Chinese University of Hong Kong – University of Exeter Joint Centre for Environmental Sustainability and Resilience (ENSURE) aims to embark on large, impactful interdisciplinary collaborations to tackle emerging issues related to a changing environment and human health and wellbeing. ENSURE serves as a platform for international academic exchange, promoting policy-related works, and nurturing the next generation of young researchers to address sustainable development challenges. Drawing on the complementary strengths of the two universities – the Institute of Environment, Energy and Sustainability (IEES) at CUHK and the Environment and Sustainability Institute (ESI) at the University of Exeter (Exeter) – the two Universities enter into this long-term partnership to strengthen research impact and visibility globally. This joint research center reflects our common vision in promoting interdisciplinary research excellence which delivers benefits by tackling grand challenges and fulfilling societal needs globally.

More details about the research collaboration can be found on the following websites:
